1 INTRODUCTION

This report gives a quarterly update on data collected by the Whitsunday Water Quality Monitoring Blueprint for Tourism Operators in the first quarter of 2021. The water sampling and logger maintenance schedule for this period is outlined in Table 1.1.

For project background and methodology please refer to the annual report: Iles, JA & Waltham, NJ 2020, 'Whitsunday Water Quality Monitoring Blueprint for Tourism Operators: Annual report 2019-2020', Centre for Tropical Water & Aquatic Ecosystem Research (TropWATER) Publication, James Cook University, Townsville, 29 pp.

Table 1.1. Monitoring events for the first quarter of 2021. Events covered in previous reports are shown in grey.

Event	Date scheduled	Cairn Beach (WH1)	Tongue Bay (WH2)
a	04/02/2020	Ocean Rafting / TropWATER	Ocean Rafting / TropWATER
b	04/03/2020	True Blue	Red Cat
c	11/05/2020	Ocean Rafting	Ocean Rafting
d [#]	26/05/2020	Thunder Cat	Red Cat
e	23/06/2020	Ocean Rafting	Ocean Rafting
f	08/08/2020	Ocean Rafting	Ocean Rafting
g	17/09/2020	Ocean Rafting / TropWATER	Ocean Rafting / TropWATER
h	21/10/2020	Southern Cross Sailing / Red Cat	True Blue Sailing
i [#]	18/11/2020	Red Cat	True Blue Sailing
j	13/12/2020	Red Cat	Ocean Rafting / True Blue Sailing
k	21/01/2021	Red Cat / Southern Cross Sailing	Ocean Rafting / True Blue Sailing
l	05/03/2021	Southern Cross Sailing / Ocean Rafting	Red Cat / True Blue Sailing

[#] water sampling only

2 RESULTS

The results within this report cover the period 16/12/2020 to 07/03/2021 and are indicated in blue on the following figures. There were two logger instrument deployments during this period. Cairn beach deployment 8 and 9 were on a single logger for the period covering 19/02/2020 to 05/03/2021 (76 days). Two consecutive loggers were deployed at Tongue Bay Deployment 8 16/12/2020 to 20/01/2021 (35 days) Deployment 9 covered the period 23/01/2021 to 07/03/2021 (43 days) for Tongue Bay. Results from deployments reported in previous reports are shown in grey on figures and tables throughout.

2.1 Logger data

2.1.1 Water temperature

Water temperature during the last two deployment periods ranged from 27.08 to 28.98 °C at Cairn Beach and 27.2 to 29.4 °C at Tongue Bay (Figure 1). Temperature data was unavailable at Tongue Bay for the first half of Deployment 9 due to sensor failure.

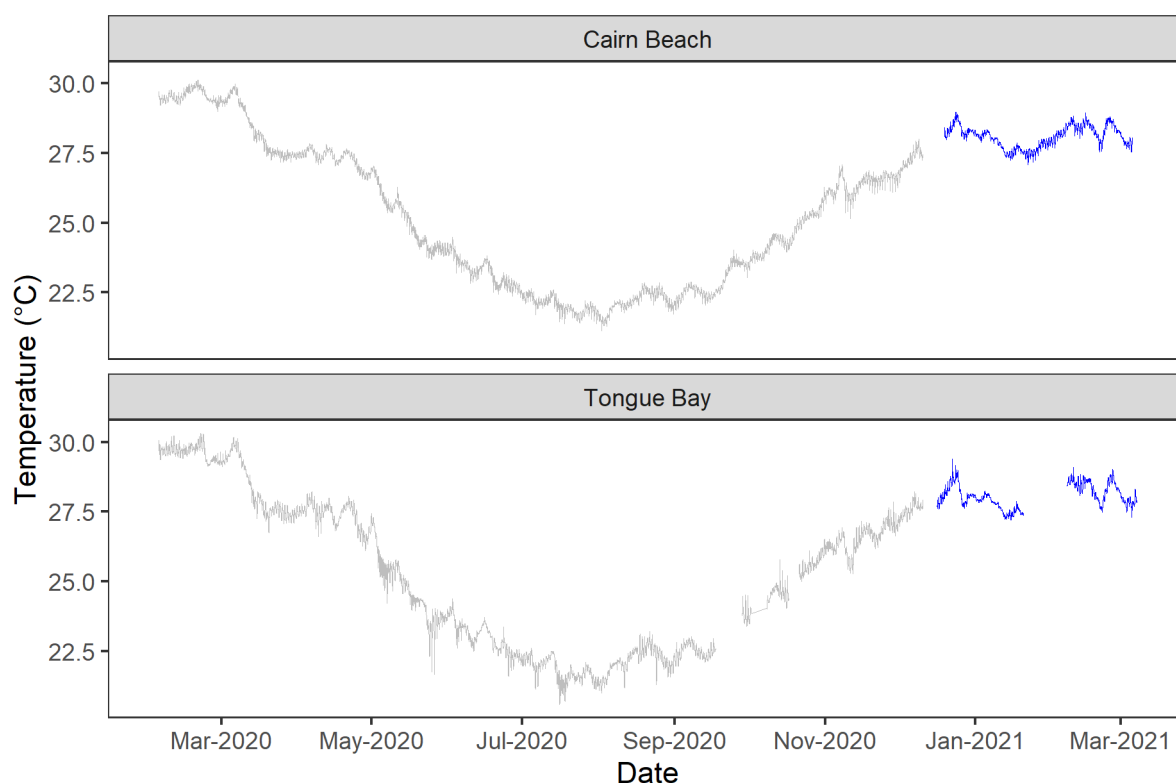

Figure 1. Water temperature measured at Cairn Beach and Tongue Bay

2.1.2 Water depth and wave height

The average water depths of the logger at Cairn Beach was 7.2 m for Deployments 8 and 9. Average water depths of the logger at Tongue Bay was 10.4 and 8.5 m for Deployments 8 and 9 respectively (Figure 2). There appears to have been a shift in the location of where the logger was placed compared to previous deployments. The root means square (RMS) depth is shown in Figure 3. There was very little wave activity at the Cairn Beach site with RMS depth generally less than 0.005 m throughout the deployment periods (average = 0.004 m). Tongue Bay was more exposed to wave energy with mean RMS depths of 0.024 and 0.026 m for Deployments 8 and 9 respectively.

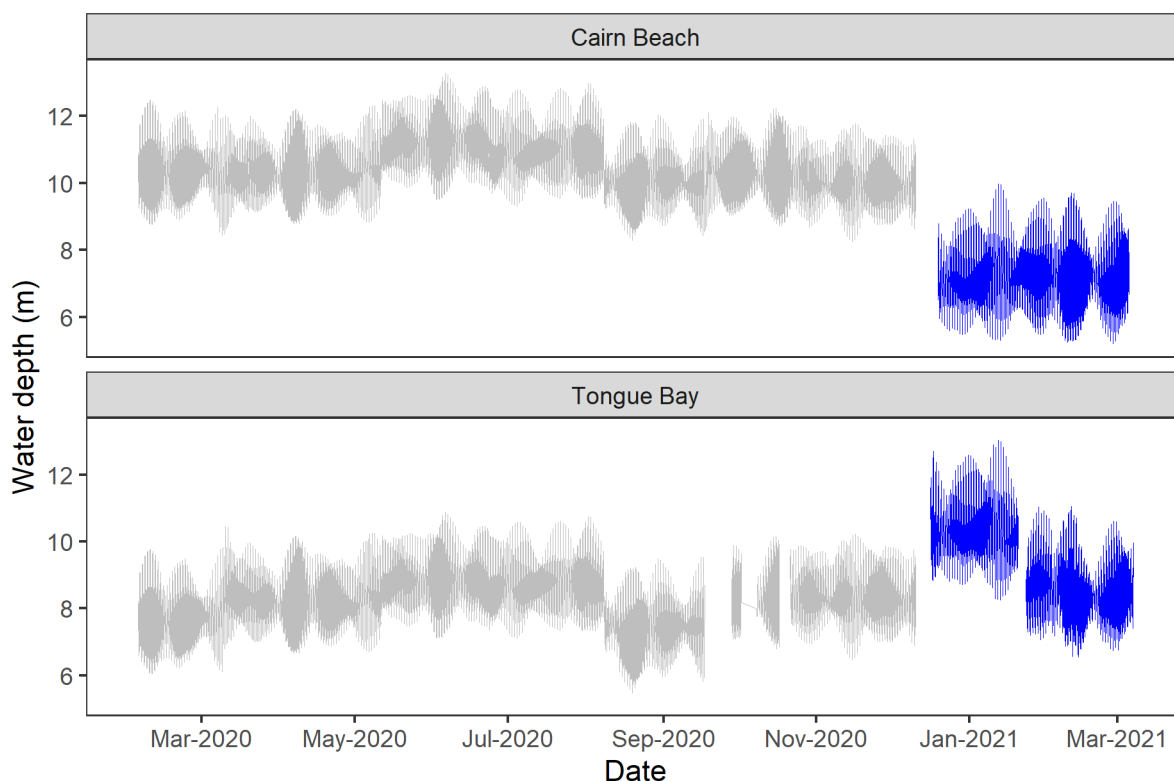

Figure 2. Water depth measured at Cairn Beach and Tongue Bay

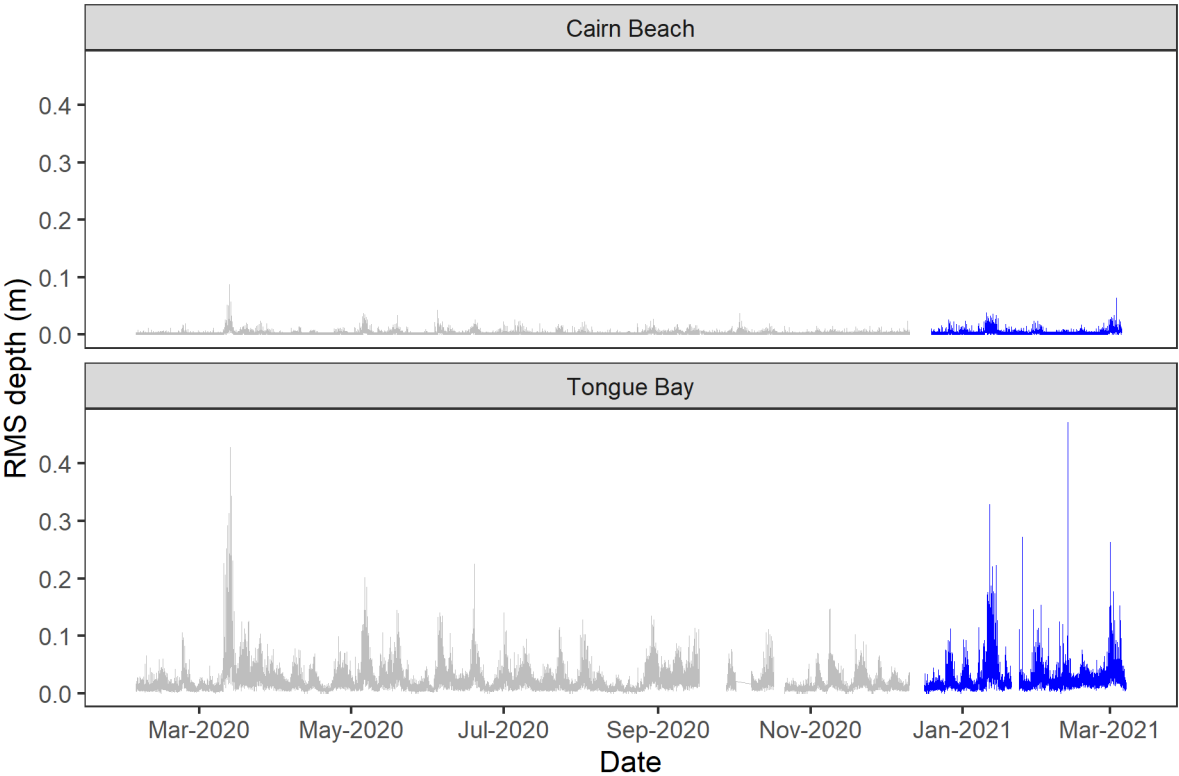

Figure 3. Root mean squared (RMS) water depth measured at Cairn Beach and Tongue Bay

2.1.3 Photosynthetically active radiation (PAR)

Photosynthetically active radiation (PAR) measured at depth followed a typical diel cycle with higher values during the day, decreasing to zero overnight (Figure 4). The PAR sensor failed on the logger for Deployment 8 at Tongue Bay, hence no data available for that period. Daily photosynthetically active radiation is shown in Figure 5. The mean daily PAR value was $0.76 \text{ mol m}^{-2} \text{ d}^{-1}$ at Cairn Beach for the period covering Deployments 8 and 9. Mean daily PAR was $0.5 \text{ mol m}^{-2} \text{ d}^{-1}$ at Tongue Bay for Deployment 9.

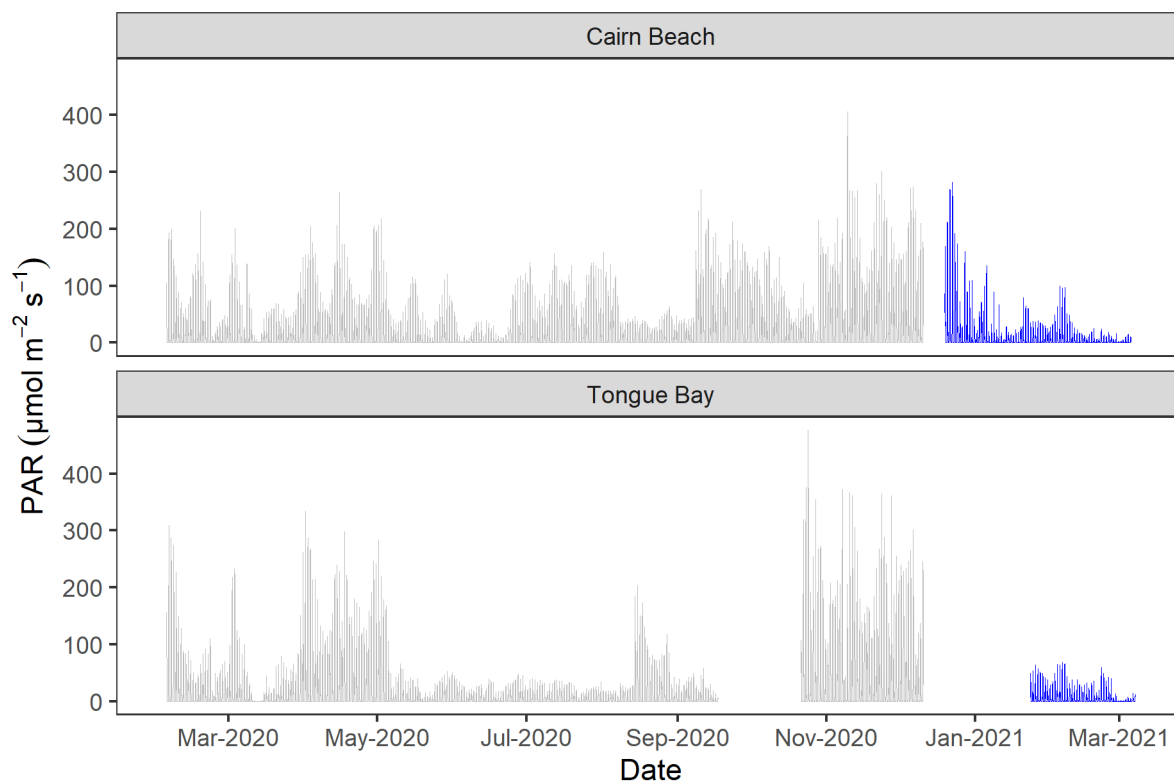

Figure 4. Photosynthetically active radiation (PAR) measured at 10 min intervals at Cairn Beach and Tongue Bay

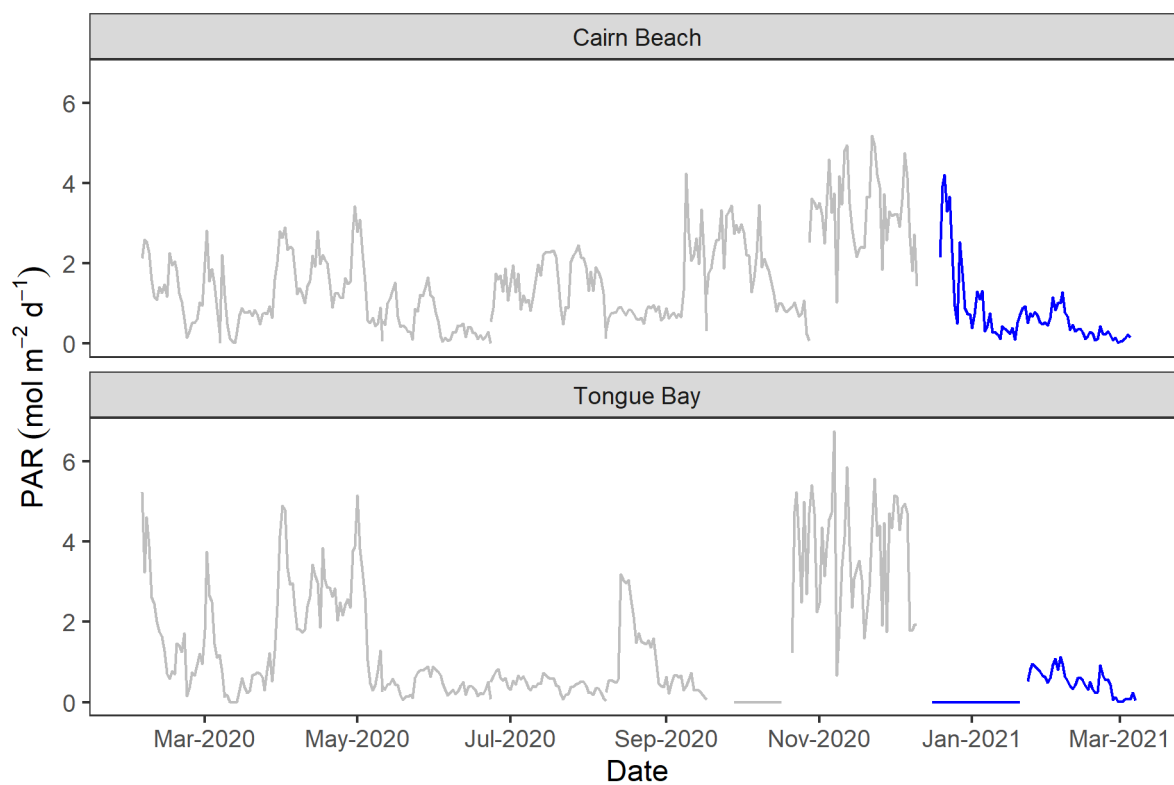

Figure 5. Daily photosynthetically active radiation at Cairn Beach and Tongue Bay

2.1.4 Turbidity

Turbidity ranged from 0.05 to 63.75 NTUe at the Cairn Beach monitoring site, with an average value of 1.73 NTUe over the deployment period (Figure 6). Turbidity ranged from 0.05 to 150.2 NTUe at the Tongue Bay monitoring site, with an average value of 5.88 NTUe over the deployment period. The Tongue Bay logger had issues with sensor fouling during deployment 9 and data removed during the data QC process.

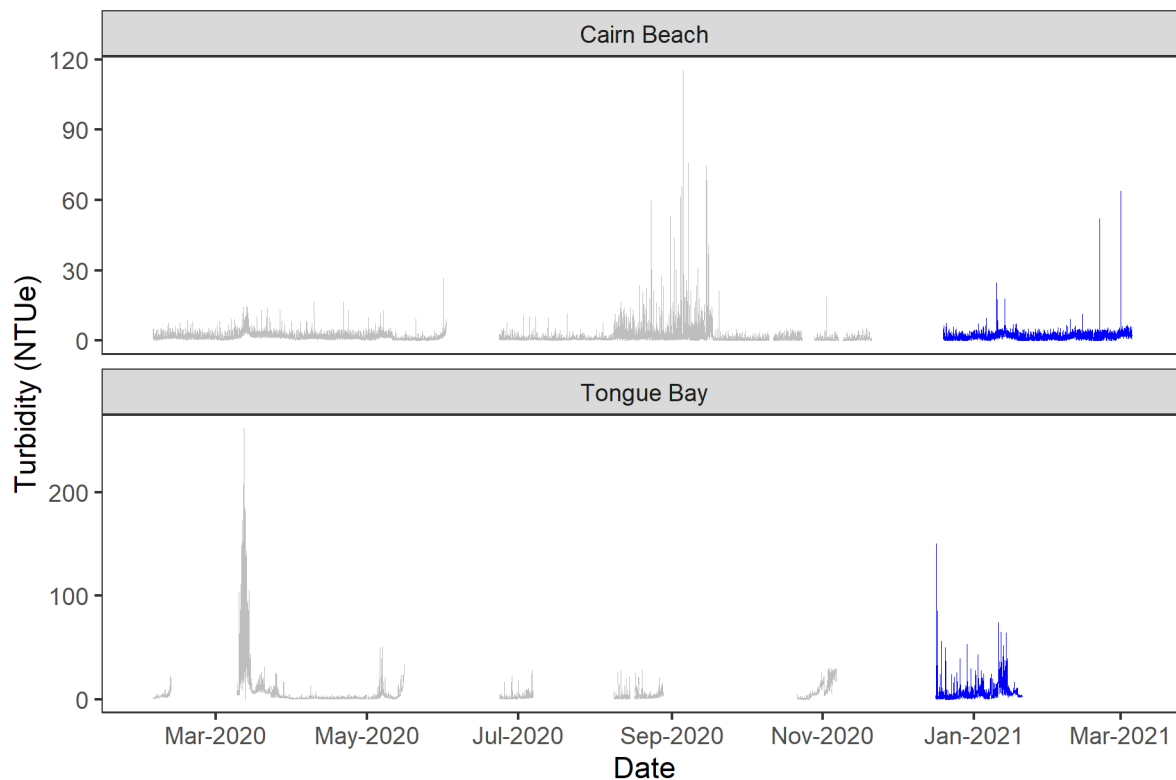

Figure 6. Turbidity measured at Cairn Beach and Tongue Bay. Note different y-axis scale. Data has been removed from the timeseries for periods where the sensor fouled.

2.2 Water samples

2.2.1 Field observations

The tourism operators recorded observations of conditions on the water at the time of each sampling and maintenance event (Table 2.1). Secchi depths measured by tourism operators at Cairn Beach and Tongue Bay are shown in Figure 7.

Table 2.1. Water quality measurements and observations recorded from Cairn Beach and Tongue Bay.

Site Name	Site Code	Date	Time	Secchi depth m	Cloud cover %	Wind knots	Sea surface	Surface scum/slick
Cairn Beach	WH1	04/02/2020	13:45	4.5	15	5 - 10	Calm	Nil

[#] Note: Likely erroneous measurement, ^{*} Note: Secchi depth estimated, NR = not recorded.

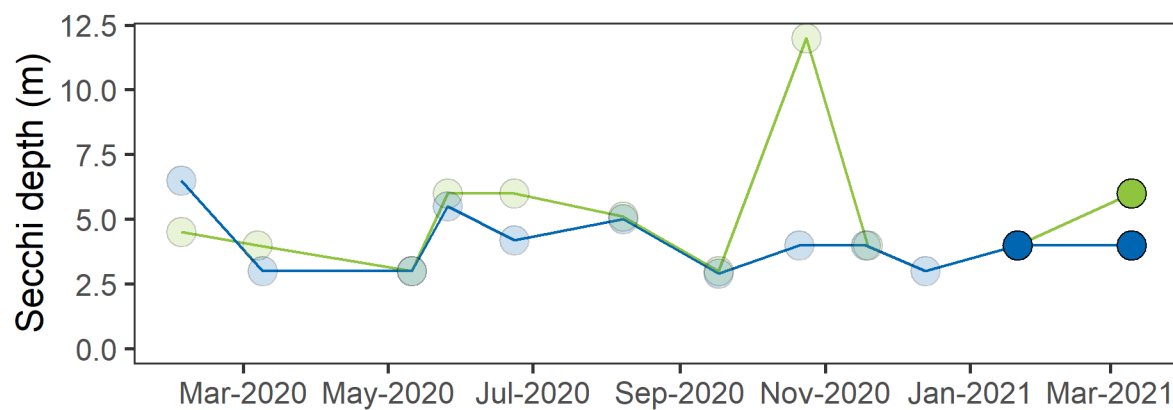

Figure 7. Secchi depth measured at Cairn Beach and Tongue Bay.

2.2.2 Physico-chemical parameters

Water samples collected from the monitoring sites during January and March 2021 were measured in the laboratory for electrical conductivity, total suspended solids (TSS), and pH (Table 2.2, Figure 8). Conductivity ranged from 51.70 to 52.46 mS cm⁻¹ and was within expected range of seawater with limited freshwater inputs. TSS ranged from 1.4 to 2.4 mg L⁻¹. pH ranged from 8.16 to 8.25.

Table 2.2. Electrical conductivity (Cond, mS cm⁻¹), Total suspended solids (TSS, mg L⁻¹) and pH of surface water samples collected from Cairn Beach and Tongue Bay.

Site name	Site code	Sample Date	Cond	TSS	pH
			mS cm ⁻¹	mg L ⁻¹

		10/03/2021	52.46	1.4	8.20

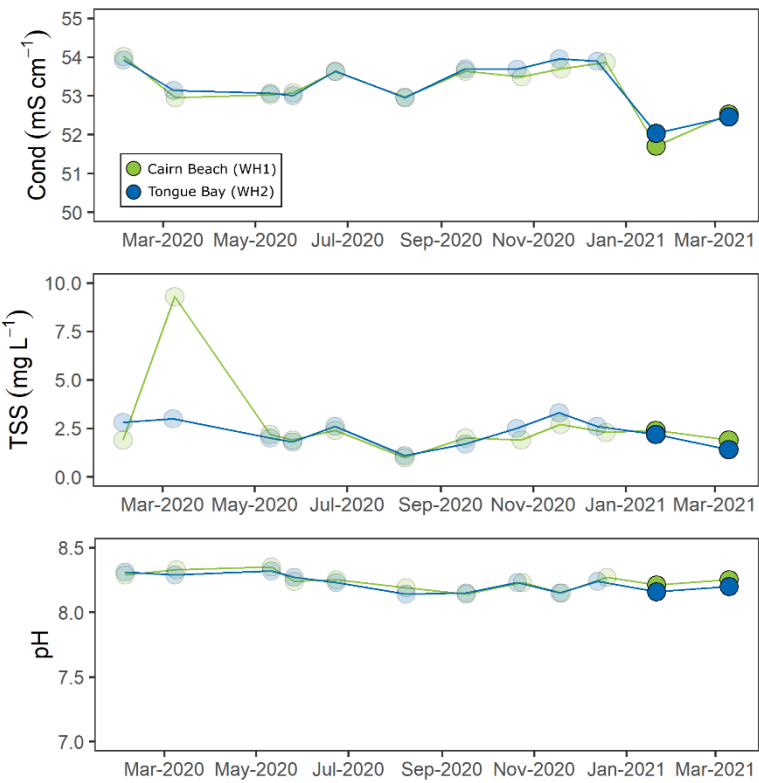

Figure 8. Electrical conductivity (Cond), total suspended solids (TSS), and pH of water samples collected from Cairn Beach WH1 (green) and Tongue Bay WH2 (blue).

2.2.3 Nutrients

Results for water samples collected during the three most recent scheduled trips are presented below, with previous sampling events shown in grey for comparison. Nitrogen and phosphorus concentrations are presented in Table 2.3. Total nitrogen concentrations ranged from 101 to 162 $\mu\text{g N L}^{-1}$ during the most recent sampling events (Figure 9). Total phosphorus concentrations ranged from 6 to 8 $\mu\text{g P L}^{-1}$ (Figure 10). The bulk of nutrients were present in the dissolved fraction with 54 to 94 % nitrogen dissolved, and 63 to 100 % phosphorus dissolved. Nitrate-nitrite concentrations ranged 2 to 11 $\mu\text{g N L}^{-1}$.

Table 2.3. Nutrient concentrations measured in surface water samples collected from Cairn Beach and Tongue Bay. Total nitrogen (TN), total dissolved nitrogen (TDN), particulate nitrogen (PN), nitrate-nitrite (NO_x), total phosphorus (TP), total dissolved phosphorus (TDP), and particulate phosphorus (PP). All concentrations reported in micrograms per litre ($\mu\text{g L}^{-1}$).

Site name	Site code	Sample Date	TN $\mu\text{g L}^{-1}$	TDN $\mu\text{g L}^{-1}$	PN $\mu\text{g L}^{-1}$	NO_x $\mu\text{g L}^{-1}$	TP $\mu\text{g L}^{-1}$	TDP $\mu\text{g L}^{-1}$	PP $\mu\text{g L}^{-1}$

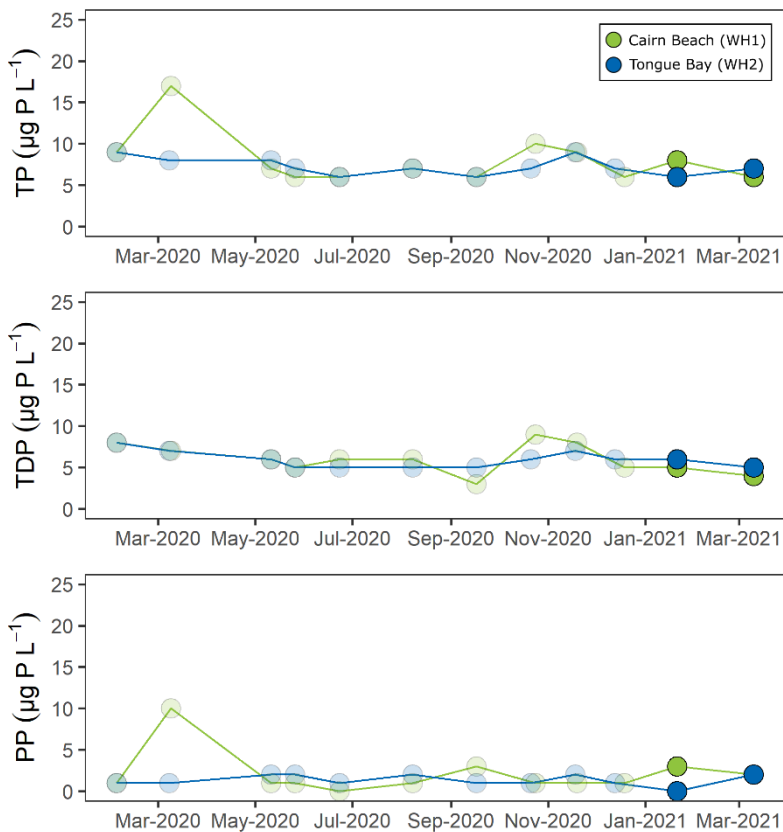

Figure 10. Total phosphorus (TP), total dissolved phosphorus (TDP), and particulate phosphorus (PP) concentrations measured in water samples collected from Cairn Beach WH1 (green) and Tongue Bay WH2 (blue).

2.2.4 Chlorophyll *a*

Chlorophyll *a* values ranged from 0.37 to 0.65 $\mu\text{g L}^{-1}$ between sites during the most recent sampling events (Table 2.4, Figure 11). Phaeophytin *a* concentrations ranged from below detection limit ($< 0.2 \mu\text{g L}^{-1}$) to 0.39 $\mu\text{g L}^{-1}$.

Table 2.4. Chlorophyll-*a* and Phaeophytin-*a* concentrations measured in surface water samples collected from Cairn Beach and Tongue Bay. All concentrations reported in micrograms per litre ($\mu\text{g L}^{-1}$).
